

Francesca Della Torre graduated with a master's degree in Pure and Applied Mathematics from the University of Rome "Tor Vergata", summa cum laude, in 2016. In the same year she won the University Annual Award for the best student in the Department. In the final phase of her studies, she began collaborating with the Semeion Research Center of Sciences of Communication. On January 2017 she became a part-time collaborator of Semeion. During this period, she worked with the University of Rome "La Sapienza" within a research project and as a higher education teaching professional. In 2018 she was confirmed as a Semeion full-time researcher. She studied in depth data analysis, data mining and mathematical models for automatic learning, the main objects of her current research activity. She participated in the draft and edit of several scientific papers.
